Andres Muñoz

Interaction Designer | Creative Technologist | UX Prototyper
(612)9998875 | web.andres.m@gmail.com | www.andresplay.com

Interaction designer and creative technologist building real-time interactive systems across AR, digital products, and experimental interfaces. Experience spanning Snap, NASA JPL, and systems-level fabrication, blending human-centered design with prototyping and engineering.

Technical Skills

Design
User Research, Wireframing, Interaction Design, Information Architecture, UX/UI

Creative Technology
Lens Studio, Creative Coding, Real-Time Systems, Interactive Prototyping

Tools
Figma, Adobe Creative Suite, Blender, JavaScript, HTML/CSS

Experience

Snap Inc. – Content Specialist | Software Developer
2023 - 2026
- Delivered interactive AR experiences for large-scale sports and entertainment activations
- Produced Lens experiences from concept, storyboards, prototyping, and implementation through deployment
- Developed reusable Lens systems that streamlined production workflows
- Collaborated across creative and engineering teams to launch sponsor-facing experiences

NASA Jet Propulsion Laboratory – Research Intern
2022 - 2023
- Contributed concept development and speculative design research for emerging interactive systems
- Developed prototypes responding to ambiguous technical and human-centered challenges

SpaceX – Materials & Propulsion Technician
2019 - 2021
- Supported assembly and testing of critical propulsion subsystems in high-precision manufacturing environments
- Contributed to process improvements in collaboration with engineering teams

Selected Projects

Multiplayer AR Game for Large Screens and arenas
Designed and programmed a multiplayer AR game in Lens Studio involving synced gameplay logic and interactive scoring.

Face recognition Prototype for the Summer Olympics 2024
Designed and programmed a game that uses face detection models as a controller for an AR game used to pitch our tech to the olympic comite

AR Polling and Voting for In-game experiences
Participated inn a cross functional team with internal and external creators at snap to create a Live Polling and Voting system using augmented reallity and field tracking.

Marketplace UX Concept
Designed and prototyped a service concept addressing food waste and resource access in Los Angeles.

Education

B.S. Interaction Design
Santa Monica College

A.S. Graphic Design
Santa Monica College

B.S. Industrial Design
Universidad de los Andes
